SHORTENED STATUTORY	PERIOD OF RESPONSE	MAIL DATE		DELIVERY MODE	
3 MON	THS	04/04/2007		PAPER	

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

	Application No.	Applicant(s)				
* 4	10/676,721	ACAR ET AL.				
Office Action Summary	Examiner	Art Unit				
	Claire Wang	2624				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 30 Se	eptember 2003.					
<i>,</i>	, —					
• •	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-16</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5)⊠ Claim(s) <u>1-6</u> is/are allowed.						
6)⊠ Claim(s) <u>7-16</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9)☐ The specification is objected to by the Examine	r.					
10)⊠ The drawing(s) filed on 30 September 2003 is/a	are: a)⊠ accepted or b)⊡ objec	ted to by the Examiner.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.						
Attachment(s)						
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)	4) Interview Summary Paper No(s)/Mail D	ate				
3) Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date	5) Notice of Informal F 6) Other:	Patent Application

Art Unit: 2624

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The USPTO "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" (Official Gazette notice of 22 November 2005), Annex IV, reads as follows:

Descriptive material can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." In this context, "functional descriptive material" consists of data structures and computer programs, which impart functionality when employed as a computer component. (The definition of "data structure" is "a physical or logical relationship among data elements, designed to support specific data manipulation functions." The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) "Nonfunctional descriptive material" includes but is not limited to music, literary works and a compilation or mere arrangement of data.

When functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare In re Lowry, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994) (claim to data structure stored on a computer readable medium that increases computer efficiency held statutory) and Warmerdam, 33 F.3d at 1360-61, 31 USPQ2d at 1759 (claim to computer having a specific data structure stored in memory held statutory product-by-process claim) with Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory).

In contrast, a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035.

 Claims 11-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as follows. Application/Control Number: 10/676,721 Page 3

Art Unit: 2624

- 3. Claim 11 defines a program storage device accessible by a computer embodying functional descriptive material. However, the claim does not define a computer-readable medium or memory and is thus non-statutory for that reason (i.e., "When functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized" Guidelines Annex IV). That is, the scope of the presently claimed program storage device accessible by a computer can range from paper on which the program is written, to a program simply contemplated and memorized by a person. The examiner suggests amending the claim to embody the program on "computer-readable medium" or equivalent in order to make the claim statutory. Any amendment to the claim should be commensurate with its corresponding disclosure.
- 4. Claims 12-16 are rejected under the same rejection as claim 11. Please see claim 11 for detail analysis.

Art Unit: 2624

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida (Three-Dimensional Computer-Aided Diagnosis Scheme for Detection of Colonic Polyps) in view of Mir (Description of Shapes in CT images).

As to claim 7, Yoshida teaches a method for detecting and classifying a structure of interest in a three-dimensional medical image, comprising, in a pre-processing step, detecting said structure of interest in said three-dimensional medical image (Fig. 1 teaches Detection of polyp candidates from a 3D image); in a post-processing step, classifying said detected structure of interest based on said determined parameters (Fig. 1 also shows once the candidates for polyp are fund it is analyzed and then the polyps are discriminated from the candidates). However, Yoshida does not teach determining parameters based on edge displacement fields determined for said detected structure of interest. Mir teaches an edge-detection technique which detects the edges of an area of interests by finding an edge point (Page 80, Col. 1) within a 2-D CT image, wherein said image is part of a 3-D image system (Page 79, Col. 1, lines 1-3). Thus, the edge-detection technique of Mir reads on the claimed determining

Art Unit: 2624

parameters based on edge displacement. Therefore, it would have been obvious for one ordinarily skilled in the art at the time of the invention to combine the Yoshida's detection of Polyp candidates with the edge-detection technique of Mir in order to have a low error rate (Mir Page 79, Col. 3, lines 50-51).

As to claim 8, Mir teaches wherein said edge displacement fields are determined for a plurality of slices in each of one or more image planes defined for said detected structure of interest (2-D slices through 3-D volumes of human organs; Page 79, Col. 1, lines 1-3), wherein said plurality of slides are defined over the axis perpendicular to said corresponding image plane (2-D slices of the 3-D image, depending on where the axis is defined the 2-D slices will be perpendicular to the image plane).

As to claim 9, Yoshida teaches wherein the step of classifying further comprises the step of distinguishing a polyp from a non-polyp (Fig. 1 shows a discriminate analysis, where the false-positives are reduced).

As to claim 10, Mir teaches wherein said three-dimensional medical image comprises a three-dimensional segmented computed tomography image (2-D slices through 3-D volumes of human organs; Page 79, Col. 1, lines 1-3).

Allowable Subject Matter

7. Claims 1-6 are allowed.

8. The following is an examiner's statement of reasons for allowance:

The innovation distinction that makes the claimed invention allowable is the combinational usage of the image plane along with the edge displacement fields to calculate parameters and classifying the structure based on the parameters calculated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Summers et al. (US 6,556,696) teaches a method for segmenting medical images and detecting surface anomalies.

Kaufman et al. (US 2002/0045153) teaches a method for performing a 3-D virtual segmentation and examination.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Claire Wang whose telephone number is 571-270-1051. The examiner can normally be reached on Mid-day flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Mancuso can be reached on 571-272-7695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
